

Are you wanting to lose a few extra inches so you can slip into an outfit for that special occasion? But are finding diet & exercise are not achieving your desired results you must try our Inch Loss Wrap™!

What Is The Inch Loss Wrap™?

Inch Loss Wrap™ is an advanced body wrap treatment formulated to specifically reduce inches from your body. We use naturally formulated sea clay with added ingredients to help rid the body of toxins as it compacts fatty tissue & tightens the skin. This is an advanced inch loss treatment designed to detoxify, firm & tone the skin and is a process that gives you immediate results.

Inch Loss Wrap™ is not a weight loss treatment. If you want to be smaller you need to diet & exercise to break down your fat cells. Our Inch Loss Wrap™ is the missing link - it works on the skin & the soft fatty tissue

- **Slimming**
- **Toning**
- **Tightening**.

It gives you immediate results, leaving your skin feeling trimmed, toned & terrific!

Inch Loss Wrap™ Procedure

On arrival you will be asked to complete a health questionnaire. You will then be taken into a treatment room asked to undress & put on disposable underwear. You are then measured & marked on various parts of your body. An Inch Loss Wrap™ specialist will wrap your body all over in bandages lifting up the buttocks & breasts. As well as pulling in your waist, thighs & generally sculpting the body. Once you are wrapped you will look like an 'Egyptian Mummy'! You will then lay on a treatment bed wrapped in a thermal blanket to keep you warm & comfortable for the next hour. After which you will be unwrapped & re-measured. It is not necessary to shower after an Inch Loss Wrap™ as it is also a full body exfoliation leaving your skin feeling clean and refreshed. Once you are dressed an Inch Loss Wrap™ Specialists will review your measurements & advise you of your inch loss & explain your after-wrap care.

LOSE 6 Inches & KEEP IT OFF!

Reduce Inches Rather Than Take Off Kilo's

Inch Loss Wrap™ process is designed to reduce inches rather than take off kilos. The average inch loss is between 6 to 30 inches on your first treatment. You can reduce a complete dress size with a series of Inch Loss Wraps™. If you are dieting & exercising you can achieve even greater results! Why? Because it helps stimulate collagen & fat cell reduction below the skins surface. It also helps rebuild the skins elasticity leaving you with

- **Smoother**
- **Sexier**
- **Refined Skin.**

How To Prepare?

Do not shower for 6-8 hours before the wrap, avoid all soaps and body lotions as these will clog your pores and hinder the effectiveness of your results. Do not eat after 630pm, as your body burns the least amount of calories whilst sleeping, and the body tends to turn unburned calories into fat.

Will My Inches Return If I Drink Water?

No! We strongly recommend that you drink plenty of water as this will help to keep you hydrated and flush out the toxins more effectively.

How Much Will I Loose?

The amount of toxic acculumation your body is storing will determine the amount of wraps you will need to get maximum results. This is usually between 3-5 Inch Loss Wraps taken 7-10 days apart.

Can Men Benefit From the Inch Loss Wrap™?

It's a great treatment for men who want to tone and tighten skin and maintain a musclier body. It is also great for men to detox their bodies with this treatment to maintain a healthy more defined abs and body.

Will The Inches Stay Off?

The inches lost are not a result of water loss, accordingly they will stay off for a minimum of 30 days, and can stay off permanently if you have a healthy lifestyle and do not put on any weight.

What Are Toxins?

Toxic accumulation is due to improper diet, stress, illness, medication, drinking, smoking & weight loss. Toxins are stored in the fluid between the fat cells. Women can also have a build-up of toxins due to hormonal changes such as menopause or pregnancy.

Keeping Inches Off!

- Do not shower for 6-8 hrs after wrap
- Do not use any soaps or body lotion for 48 hours
- Avoid alcohol, soft drinks, fatty foods etc.
- Drink 8-10 glasses of water to help flush any excess toxins from your body.

Guarantee - Loose 6 Inches or it's FREE!

Will It Reduce Bust Size?

Inch Loss Wrap™ will not reduce your bust size however inch loss can occur on the back around the bra strap area. On smaller busted women this can give the appearance of bigger breasts as the wrap tightens the skin & compacts the fatty tissue around the back, midriff & waist area enhancing the bust.

Does It Help With Cellulite?

Cellulite is the hardening of fat cells surrounded by toxins pushing into the skin's dermis which causes the orange peel effect. Our Inch Loss Wrap™ can aid in the elimination of these toxins, which will result in significant improvement of cellulite by leaving the skin smoother & firmer. For maximum results you will need a minimum of 3-5 treatments.

Testimonial From One Inch Loss Wrap™!

"I really enjoyed my Inch Loss Wrap treatment, I lost 12.9 inches. The customer service was exceptional, the girls made me feel so comfortable & their pampering process made my day. I instantly could see a change in the shape of my fat on my stomach and legs. It was an awesome experience, I felt more toned with firmer skin and my tummy was flatter. It was the following day that I felt much tighter and slimmer noticing a big change in my cellulite as the bumps were way smoother and softer. I also think it's a great kick start to weight loss as I have lost 8kgs since my wrap 10 weeks ago! Thanks girls."
